# Testimonials

"I have been Jeannine's client for 11 months and her coaching has made me a better version of myself. She helped me shift my perspective and put action behind the things I kept telling myself I'd do "one day". In less than a year, I've made major strides in my entrepreneurial career, how I present myself in professional environments, and mending/creating personal relationships. This experience has helped me align my actions with the future I want to create."
